MANNAN SHETH

Computer Engineering | Software Development & AI
Mumbai, India | +91 9869968987 | mannan.sheth4@gmail.com | Github | LinkedIn

SUMMARY

Computer Engineering student with experience engineering end-to-end software systems across the application, API, database, and AI layers. Built production-oriented platforms involving complex business workflows, database optimization, automation, real-time functionality, and applied ML/LLM capabilities. Experienced with React, Node.js, Python, .NET, and MySQL, focused on scalable backend systems and product engineering.

EDUCATION

Aug 2022 - May 2028

Mukesh Patel School of Technology Management & Engineering, NMIMS
Integrated Diploma + B.Tech in Computer Engineering | CGPA: 3.96/4.00

TECHNICAL SKILLS

Languages: JavaScript, Python, C#, SQL
Frameworks & Platforms: ReactJS, Flutter, Node.js, Express.js, Flask, ASP.NET Core/MVC
Databases: MySQL
AI/ML: SVM, XGBoost, NLP, Fuzzy Matching, Ollama, LLM Integration
Cloud & Infrastructure: AWS EC2, DigitalOcean, Linux, Nginx, Apache
Developer Tools: Git, GitHub Actions, CI/CD Pipelines

PROJECTS

Finance Management System for Scientific Scholar Pvt. Ltd.)
C#, ASP.NET Core MVC (.NET 8), MySQL, GitHub Actions

- Unified billing, invoicing, journals, receipts, bank transactions, payroll, royalties/TDS, and reporting into a single traceable finance platform.
- Secured financial workflows with AES encryption, runtime key retrieval, and IP-restricted access; SVM/XGBoost for transaction classification, deployed on AWS EC2/Linux with CI/CD.
- Automated financial calculations, document generation, reporting, and billing workflows, improving operational efficiency by ~15% and reducing billing overhead by ~10%.

ReportR - Civic Issue Reporting System
Github : ReportR
React.js, Node.js, Express.js, Flask, MySQL

- Engineered an AI-driven resolution workflow spanning geo-tagged reporting, automated image classification, moderation, and issue tracking.
- Architected Node.js/Express and Flask services with REST APIs, JWT/RBAC, and location-aware issue workflows.
- Implemented location-based crowdsourced verification, letting nearby users validate issue resolution with real-time status updates, speech-to-text, and multilingual input.

RecipeVerse - AI-Powered Recipe Web App
Github : RecipeVerse
React, Node.js/Express, Flask, MySQL, Ollama/Mistral, MoviePy, Coqui TTS

- Developed an AI recipe platform using locally hosted Mistral via Ollama, with Node.js/Express and Flask orchestrating recipe generation and nutritional analysis.
- Orchestrated an automated multimedia pipeline using Coqui TTS and MoviePy to transform generated recipes into narrated videos with dynamic visual assets.
- Integrated MySQL with external nutrition and media services to orchestrate the pipeline from user ingredients to structured recipes and finished videos.

Research & Achievements

AdaptQ — Quantum RL-Based Adaptive Radiotherapy | SIH 2026
Quantum reinforcement learning approach for adaptive radiotherapy optimization
